Andrey Petrikov - Frontend developer

Saint Petersburg, Russia

English	Vue - Vuex	Agile
Russian	React - Redux	Team player

Starting in the very beginning from Basic and Pascal I came to modern frontend frameworks like Vue and React. It has been a long and interesting journey. Through vanilla JS and JQuery jungles full of unexpected inputs and impressive solutions.

Now I am addicted to FE development. Like Flux-architecture and one-way data binding. After years of teamwork I am thoroughly convinced that communication between developers is more valuable for the product than their skills.

2020   Deutsche Telekom IT Solutions

Full dev cycle. Support agile way of development.

- Close connections with testers, devops, BE devs.
- Configuring REST API.
- Fixing bugs, fixing urgent hot bugs.
- Covering code with unit-tests.
